# Total Security Management

Remote Site Monitoring

Motion Detection With Image Capture

Adaptable Trigger Logic

Fire Alarm Panel Integration

Security Light and Siren Control

Multiple Entrance Detection

Hazard Safety Monitoring

Ingress / Egress Log With Images

SMS Text, SNMP Trap and Email Alarms

Time Based Security: Out of Hours

Reliable security throughout with immediate alarm notification direct to you.

NetCommander's
Total Security Management Solution
Your Security Guard

Guard Your Building With Intelligence

NetCommander is the ever-vigilant solution for building security. It is a cost effective, Ethernet device for monitoring and logging. NetCommander provides local and remote security through an array of sensors from unauthorised access to environmental hazards.

Adaptable logic allows intelligent protection against intruders, eliminating false alarms and ensuring correct action is taken. The secure Internet-based interface allows remote site monitoring anywhere in the world. Alarms and status can be sent direct to you through email, SMS text, SNMP traps and unmissable on-screen alerts.

When intrusion is detected, multiple camera support provides immediate access to the scene. Automatic image capture, stored internally and emailed immediately, provides a visual record whenever an incident occurs and the ability to monitor activity in vulnerable areas. This system allows you to apply equal vigilance to protect against environmental threats with immediate alert of any situation from fire to flood.

Event triggered and user defined periodic logging provides a comprehensive record of all areas under NetCommander's supervision. All logs generated by NetCommander can be imported in to standard spreadsheet applications for graphing and archiving. Automated file transfer allows easy storage of data both on and off site.

Technical Specification

Features

Alerts: On screen, email and SMS text
Advanced camera control
Ethernet attached standalone device
Monitoring with up to 16 sensors
Simultaneous control of up to 16 devices
Advanced internal event logic
Real time sensor data
Event logging, storage and graphing
Log file transfer to any computer
Built-in Interface: no installation required
Platform independent (Apple, Windows, Unix)
Wi-Fi option

Sensors

Temperature	Light
Humidity	Fire Alarm Panels
Pressure	Motion
Water	Contact
Cameras	

NetCommander General

Power Supply	240v AC / 12v DC
Dimensions	164mm x 104mm x 55mm
Weight	500g approx.

CE approved
